

William Panchaud

Fairways, Mill Lane, Felbridge, West Sussex RH19 2PF

Mob: 07446 835396 Email: contact@willpanchaud.com

Web: www.willpanchaud.com

Profile:

I am a dedicated and hard-working individual with eagerness to learn, work and develop new skills. I am practically minded and take initiative when needed, as well as being patient and polite with everybody. I work well in a team or as an individual, dealing well with pressure and always remaining calm. I am currently seeking graduate opportunities with a cutting edge business to broaden and develop my skillsets.

Skills:

Technical IT Skills

- Web Design Skills – Experience working with HTML5, CSS3, Javascript and JQuery as well as using APIs to create dynamic and artistic websites.
- Arduino, Node Red, MQTT - Experience working with all these as part of a number of projects for degree.
- Creative Coding – Worked with Processing(Java) for creative and interactive projects as part of degree. I enjoy the challenge of overcoming coding barriers.
- Graphic design/photo manipulation – Design skills using Photoshop and Illustrator amongst others to create company/product branding and artistic images.
- Full MS Office skills.
- Presentation creation skills
- Video and Audio Editing –Experience using Premiere, After Effects, Garageband and Audacity.
- App Dev – Experience using phoneGap as well as basic knowledge of native iPhone App creation drawn from employment at Greycourt Software.

Communication Skills

- Experience giving presentations in front of varying size audiences in a confident and professional manor
- I have worked with foreign exchange students at school who had limited understanding of English.
- High level of written communication skills and experience, ranging from essays to written reports, and creative writing.

Team Work

- Have worked well within groups throughout my education, working on a range of projects from manual labour projects to artistic design projects and conceptual ideas.
- Played basketball for under 19s team at school requiring good team work and communication to achieve a good result

- Experience working within a team carrying a project through from concept to finished product.

Problem Solving

- Experience dealing with and overcoming problems working on a variety of projects, including environmental regulations, copyright, technical issues and other unexpected hitches to project development.
- Very logically minded and therefore enjoy the challenge of overcoming problems when coding and also on more practical projects.

Portfolio

I have a portfolio website at www.willpanchaud.com which is regularly updated with projects and evidence of the skills acquired.

Employment:

Tellonline – 2013

I worked with Tellonline providing freelance web and graphic design services, recent projects included re-skinning HTML5 canvas games.

Greycourt Software Ltd – 2011

After spending a week with Greycourt Software in 2009 as part of work experience where I was assisting with the creation of graphics for an iPhone application, I was invited to return for two weeks paid employment. I worked on a number of different projects in this time, mainly developing a website for them. (Reference attached)

Blacklands Farm Activity Centre – 2009

Blacklands Farm employed me for a week as part of my work experience. I supervised activities and instructed customers, shadowed senior members of staff and helped prepare and check equipment for various different leisure activities.

Qualifications/Education:

University Of Plymouth:

Digital Art and Technology BSc - (Specialism: Interaction Design) – 2:1

Central Sussex College (Haywards Heath):

2 A-Levels (Film Studies, Applied IT)
BTEC Level 3 Diploma IT Practitioners

Re: Employment reference for Will Panchaud

To whom it may concern,

Greycourt Software Ltd. (gsl.com) employed Will on two occasions. The first was in the summer of 2009 in a student placement role for a week-long work experience. During that time, Will helped to create images for use in an iPhone application which we were developing.

We employed Will again in April 2011 for two weeks during the Easter Holidays. During that period he worked again on creating images, and also helped with the re-design of a website we were working on. He wrote HTML and CSS code and contributed to the re-structuring of the pages of the site. As a side project he also worked through exercises to learn how to code in Objective-C and use the XCode development tool to build a desktop application for Mac OS X.

On both occasions I found Will to be punctual and hard-working. He has a willingness to learn new skills and, at all times, demonstrated the highest degree of honesty and integrity.

Regards,

A handwritten signature in blue ink, appearing to read 'Doug Clinton', written over a light blue horizontal line.

Doug Clinton

Director, Greycourt Software Ltd.
